

Vacuum Dewatering Box 25-Yard Roll-Off

Vac Box Dewatering Roll-Off / Phase Separator Vacuum Box

A Time-Saving Solution for Your Dewatering Project

FEATURES

- **SAFETY** ✓ Side-swing rear gate for safety, double-ratcheted for security
- **SAFETY** ✓ Safety latch for anchoring gate during unloading
- Extruded rubber door seal gasket on gate
- Two 8" flanged inlets for loading
- Heavy-duty 1/4" steel construction throughout
- Liquid-tight, side-hinged tailgate features extruded rubber seal gasket
- Pick up: Standard cable with 2" x 6" x 1/4" rails
- Filter hooks for use with available filter media
- Four independent ratchet binders with chains

USAGES

- Expedites dewatering process and yields a lighter, dryer cake
- Reduces costs due to shorter rental time
- Lowers disposal fees by reducing the amount of suspended solids in waste fluid
- Creates easier disposal of contents

Why E-Tank?

COMPLETE MAINTENANCE—EVERY ITEM, EVERY TIME

Whether a Vacuum roll-off is water tight while you're using it for storage or transportation depends upon condition of the gasket on the gate. On many vacuum boxes in the rental industry, these gaskets may fail to do their job because they are contaminated with debris, cracked, broken or missing.

Every item that is returned to our yard is subjected to a rigorous inspection procedure and a thorough maintenance program. Exteriors are cleaned, valves are actuated, coatings and seals are inspected, paint is maintained and moving parts are lubricated. We also check the alignment of the gate and assure the proper operation of the hinges and rollers.
